Evaluation Process

What did we measure?

How did we measure it?

What are the results?

How will we use the information?

What We Measured

Screening:

- Students screened
- Untreated caries*
- Restorations*
- Dental sealants*
- Active orthodontic care

Services provided:

- Dental sealants*
- Fluoride varnish applications

Referral and Follow-up:

- Students referred for treatment
- Treatment in process
- Treatment completed

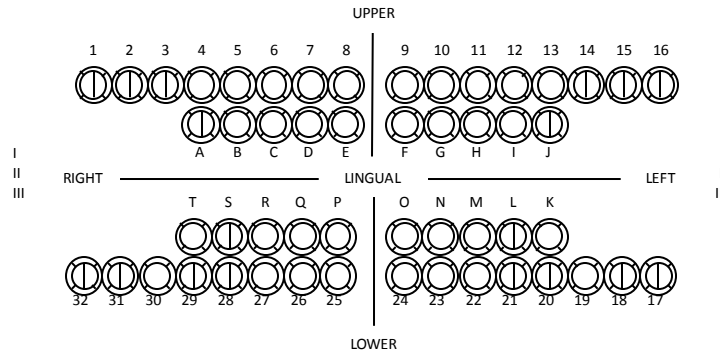

* includes tooth and/or surface specific data

How We Measured It

Screening: D=DECAY, F=Filled, M=Missing

Fluoride Treatment	Yes _____	No _____
Untreated Caries	0=No untreated caries 1=Untreated caries	Total Untreated Caries _____
Caries Experience	0=No treated caries 1=Treated caries	Total Experience _____
TX Urgency	0/6=No obvious problem 1=Early caries 2=Urgent care 3=Due for recall	4=Improve homecare 5=Sealants recommended 7= Uncooperative
Sealants Present	Yes No	
Ortho Present	Yes No	
Referred for Tx	Yes No	Where: _____
Expander/Space Maintainer	Yes No	Tooth #/Quadrant
Comments		

How We Measured It

Dentrix Family File - (Major, Erin) [SCCC] [DYOUNG] [MA0002]

Our Results to Date

Variable	Year 1	Year 2	Year 3	Year 4
# of Students Screened	Unknown	1070	1552 (+45%)	1715 (+10.5%)
% students screened with untreated decay	Unknown	4	11	5
% students screened with filled teeth	Unknown	Unknown	37	23
% students screened receiving dental exam at SBHC	Unknown	Unknown	10	99
% students screened receiving yearly cleaning at SBHC	Unknown	Unknown	8	6
% students screened referred for treatment	Unknown	Unknown	Unknown	5
% students screened and referred with completed treatment plan	Unknown	Unknown	Unknown	2

How We Use the Data

- Evaluate outreach efforts and identify areas for improvement
- Determine preventive and restorative services capacity
- Make accurate assessments of staff productivity
- Predict program income based on screening results
